# THINK WELLBEING CENTRE

SOUTHERN SCHOOL  
OF NATURAL THERAPIES

## Southern School of Natural Therapies

Southern School of Natural Therapies (SSNT) is the longest established natural therapies college in Australia.

Our treatments are supervised by experienced practitioners to ensure the highest standard of quality and service.

Services available include:

### Chinese Medicine

Chinese Medicine philosophy believes that vital energy called 'Qi' circulates throughout channels or pathways in the body called meridians. Many illnesses are brought about when the Qi circulating within the meridians becomes blocked. Chinese Medicine treatment aims to promote the flow of Qi, restoring balance and good health. Common conditions a Chinese Medicine practitioner can assist with include: digestive issues, stress, fatigue, fertility, allergies, skin conditions and musculoskeletal problems.

### Relaxation Massage

Relaxation massage therapy is applied to relieve muscular tension, stimulate circulation, improve skin function, enhance rehabilitation and reduce pain.

### Remedial Massage

Remedial massage therapy is the application of remedial massage techniques including deep tissue massage, lymphatic drainage, myofascial release, trigger points and sport and athlete massage.

### Nutritional Medicine

Nutritional medicine is focused toward the prevention and management of a wide range of health conditions through the prescription of vitamin therapy, food as medicine, and dietary or lifestyle modification. Common conditions a nutritional medicine practitioner may assist with include digestive issues, weight loss, allergies, skin conditions and mood disorders.

### Clinical Myotherapy

Clinical Myotherapy is a manual physical therapy that focuses on the assessment, treatment and management of pain and dysfunction of muscles, nerves and joints. The practitioner will complete a comprehensive assessment including a physical assessment of posture, movement patterns and palpation findings to isolate effected musculoskeletal structures. Treatments consist of soft tissue and joint mobilization augmented by the use of modalities such as dry needling and corrective exercise to strengthen, stretch or stabilize an area. Pain management techniques, ergonomic advice, thermal therapies, therapeutic aids and relaxation techniques will be provided to assist recovery.

### Naturopathy

Naturopathy is a holistic approach to health and well-being that is based on the principle that the body has an innate ability to heal itself. Naturopathic practitioners incorporate a blend of traditional knowledge and evidence based practice to help their patients achieve optimal health and wellbeing through a range of management approaches including western herbal & nutritional medicine, dietary and lifestyle advice, flower essences and homeopathy. Naturopathy may be an effective therapy for conditions such as digestive disorders, skin conditions, mood disorders, cardiovascular problems as well as fertility and preconception care.

### Acupuncture

Acupuncture is one of the most prominent therapies in Chinese Medicine, and involves selecting and needling specific points along the meridians in order to remove blockages allowing Qi to flow smoothly again.

### Western Herbal Medicine

Western Herbal Medicine clinicians are highly trained practitioners, knowledgeable in the philosophy, principles and practice of Western Herbal Medicine and medical science.

Our student practitioners can treat many conditions, both acute and chronic. Body systems such as the digestive, immune, lymphatic, reproductive, nervous and circulatory system can all benefit from herbal medicine.

## Australasian College of Natural Therapies

ACNT is a leading college of natural therapies in Australia, training 2000+ students from around the world each year.

Our treatments are supervised by experienced naturopaths, nutritionists and massage therapists to ensure the highest standard of quality.
